

Let's keep the playing field fair. Satellite radio caters for people who prefer music and not commercials. These same people are also interested in traffic & weather information. Why should people who make the choice to opt for a premium broadcasting that offers better choices of programming lose out on information that should be made readily available? My subscription to XM Satellite Radio is one of the best \$10 I spend each month and is terrific value for money. Also as a music business professional I am grateful to Satellite Radio services for its support of new artists. Satellite Radio is providing a fantastic alternative to regular broadcasting and it will be a terrible shame if the NAB succeed in limiting what programming they are permitted to offer. I strongly reject the NAB's proposals in regards to Satellite Radio and urge that you do likewise.
